Summary

Frontend Software Engineer specializing in React, Next.js, TypeScript, building data-heavy SaaS applications as well as highly interactive, animated web experiences. Currently responsible for company-wide frontend architecture, UX decisions, performance, maintainability, and delivery. Experienced in modernizing legacy React applications into maintainable Next.js and TypeScript codebases, and comfortable working closely with product, data, backend, and leadership teams. Integrates AI-assisted development workflows into daily frontend engineering to accelerate delivery, debugging, refactoring, and documentation while maintaining code quality.

Experience

RG Sciences — Remote
Frontend Engineer — 2024 May - Present

- Sole frontend owner at an ESG analytics company, responsible for company-wide frontend architecture, implementation, deployments, and delivery across the main platform and related frontend products.
- Rebuilt a 50+ page application in Next.js and TypeScript, improving page load times from 3.5s to 2.5s (a 1.4x speedup) and significantly reducing recurring frontend production issues through Chrome DevTools and Web Vitals-driven optimizations.
- Took ownership of an inherited, unstable frontend codebase, utilizing browser performance profiling and network log analysis to perform root-cause analysis and drive data-backed rebuild decisions.
- Designed and implemented complex chart- and data-heavy dashboards, translating ESG, product, and data requirements into clear, usable interfaces for technical and non-technical users.
- Migrated the marketing site from Webflow to Next.js, achieving Lighthouse scores (100/100/96/100) up from an average of 80, while owning all aspects of frontend implementation, layout and UX.

PixelForge Solutions — Remote
Frontend Developer — 2022 Nov - 2024 May

- Designed and built reusable UI components using React, TypeScript, and Tailwind CSS, improving frontend development velocity across multiple client projects.
- Refactored legacy frontend codebases and improved perceived loading performance through rendering optimizations, better loading states, and client-side caching strategies.
- Partnered directly with UI/UX designers and backend teams to architect interaction patterns, consistently reducing layout-related QA bugs by ~90% on deliverables (e.g., from 15+ bugs per sprint down to typically 1-2).
- Delivered web applications from scratch, dynamically adapting implementation to client feedback while ensuring on-time sprint delivery.

Teleperformance (Google Support) — Athens, Greece
Technical Support Representative — 2020 Feb - 2022 Nov

- Provided technical support for Google products in an SLA-driven environment, successfully resolving 40+ complex technical tickets daily under strict time pressure.
- Consistently met strict quality and performance requirements, maintaining 100% SLA compliance and a 95% average Customer Satisfaction (CSAT) score.

Projects

Adidas Brand Showcase - AI-Powered Product Discovery App

- Built a Next.js product discovery platform with AI-driven search, recommendations, and a brand-specific AI-powered chat experience using Kimi-K2-Instruct.
- Designed the interaction flow to reduce search friction, with natural-language search, recommendations, and similar-item suggestions powered by vector embeddings.
- Built database-backed discovery and recommendation features using PostgreSQL product data and validation with Zod.

Technologies: Next.js, TypeScript, Tailwind CSS, PostgreSQL, Zod, Framer Motion, Three.js, GSAP, vector embeddings

Live Demo | **Source Code** | **Video**

Esplend'or Rings

- Designed and built a full-stack e-commerce application, covering frontend implementation, backend integration, and CMS.
- Implemented a responsive, component-based UI with consistent behavior across devices.
- Integrated secure Stripe payments and advanced product filtering, optimizing image assets and client-side queries to achieve a 95+ mobile performance score on Core Web Vitals.

Technologies: Next.js, TypeScript, Tailwind CSS, Strapi, GraphQL, React Query, Stripe, Cloudinary, react-hook-form

Live Demo | **Backend Code** | **Frontend Code** | **Video**

Skills

Languages & Frontend Frameworks

React.js, Next.js, React Native, JavaScript, TypeScript

Frontend & UI Architecture

Tailwind CSS, shadcn/ui, Material UI, Framer Motion, CSS, Sass/SCSS, Styled Components, Figma

State, Data & APIs

React Query, Zustand, Redux, Context API, REST APIs, GraphQL, Zod, react-hook-form

Backend, CMS & Infrastructure

PostgreSQL, MySQL, Strapi, Sanity, Firebase, Stripe, Vercel, Node.js, Express

Testing & Dev Tools

Cypress, Vitest, Git & GitHub, AI-assisted development tools, GitHub Copilot, Cursor, Codex, Debugging, Webpack, ESLint

Development & Methodologies

HTML5, CSS3, Code reviews, Continuous Integration, Single Page Applications, Progressive Web Apps, Chrome DevTools, Cross-browser compatibility, Responsive & mobile-first design

Languages

Hungarian	**English**	**Spanish**
Native	Fluent	Intermediate

Education

University of Szeged

Computer Science BSc

Online / Distance Learning

Expected graduation: 2027

University of Kaposvar

Acting MA

Graduated: 2013
